

SCHOOL OF SPIRITUAL HEALERS

Discover your innate power to heal and be healed

WHAT IF YOU COULD DISCOVER THE POWERS HIDDEN WITHIN YOU?
AWAKEN YOUR INNER HEALER AND BE PART OF SOMETHING GREATER THAN YOURSELF?

Founded in Damanhur in 1975, and structured on the teachings of Falco Tarassaco, the School takes the student on an inner journey of self-discovery. This process goes hand in hand with theoretical and practical training coordinated between the teachers of different subject areas with their various approaches. The goal here is overall preparation, aimed especially at awakening the therapeutic and thaumaturgic powers within us, to create competent and complete Holistic Healers.

The School offers:

- Tools for a profound, positive transformation of the participant, through individual and group experience .
- Technical conditioning, opening and activating the energy channels which enable the channelling of Prana, the healing energy of the Cosmos.
- Training in the use of a complex technique for the transmission of Prana, enabling one to act and interact with Synchronicity and be able to carry out treatment at a distance.

The School has unique features:

- Participants start to be practitioners from the first year they attend School: they become healers, under direct guidance from Staff.
- Healing is done by working on time: on the present, past, and especially the future of the recipient, to bring about life experiences leading to evolution and recovery.
- It will be possible to specialize, deepening expertise in some of the following therapeutic areas: psyche, soma (body), well-being, beauty, assisting pets and animals in general, and so on.

Given the type of course and teaching, the School is aimed at:

- Those already practising in the sector who wish to improve/ upgrade their qualifications.
- Those who have no experience of practising in this field and wish to get started.

HOW THE COURSE IS ORGANIZED

Each year is offered in two different but equal modalities, to enable participants with different availability to attend:

- A 15-day intensive course, with study sessions and lessons over the whole day: morning, afternoon and evening – suitable for those who live far from Damanhur and wish to concentrate the experience in a single period of full-time dedication.
- 8 residential week-ends once a month from November to June, plus a five-day intensive course in August, reinforcing and developing what has already been taught. This modality is intended for those who are able to get to Damanhur for the monthly sessions.

PROGRAMME

Each year of the School's programme has its own central theme, a journey of discovery of the world without and the world within.

FIRST YEAR

This is the point of departure: from here you set out to explore inner and outer worlds through the expansion of everyday logic as we know it. The wider view of meanings and symbols leads to a deeper experience of spiritual growth culminating in the activation of healing through Pranothrapy. In this way you become operative as a healer from your first year at the School, and can begin healing under the guidance of your Teachers. During the first year of the course the focus is on the Elements – the four elements we detect with our senses, Air, Water, Earth and Fire, as well as the other elements from the realms of Alchemy and Selfica.

For those who opt for the monthly meetings, these are held on the third weekend of each month during the first year; the intensive, final week of the course is held during the third week in August.

THE SCHOOL'S TEACHINGS

SPIRITUAL HEALING

This subject comes directly from the Head of the School, Orango Riso (Michele Scapino). This is an approach to health, to illness and above all to healing according to Damanhurian principles and the needs of your personal journey into self-healing – you learn theory and elaboration, but most importantly you then put this into practice, learning by experience. In this the group becomes the container for growth and awareness of self, for the deep synergetic nature of the work. The course leads to awareness of what it means to heal others and thus to heal oneself.

TRAINING OF HEALERS

This subject has been developed by the School's psychologist Tridacna Belladonna (Dr. Patrizia Rosso) and its purpose is personal education and development towards a genuine, accomplished therapeutic relationship between healer and healed. In this area too, theoretical-elaborative phases and practical, hands-on phases alternate in an harmonic dance designed to change and transform.

THERAPEUTIC VISION AND DAMANHURIAN HOLISM

In this area all the typical themes of holism are dealt with according to the Damanhurian School of thought: mind-body-soul and the connections between them; prevention and prophylaxis, differences and practical settings; suggestion and the importance of the mind; energetic levels and the fields of influence we are immersed in.

SPIRITUAL PHYSICS

in this we explore the nature of surrounding reality beyond the point where quantum physics stops, but it also explores the nature of the soul and its different component parts that make us mediums, the inner personalities, the inner senses which belong to the divine origin of the human soul, reincarnation, the Laws which govern the universe and life, the structure of time, Cosmogogenesis, the spiritual ecosystems, Magic and magic technology... all of these are continually returned to at different levels over the span of the three years of the School.

ART THERAPY

Through the use of expressive arts such as the theatre of the emotions and figurative art, or working with clay and the creative use of colour, Art Therapy becomes a useful tool in the hands of the future Healer, bringing out latent creativity, as you measure yourself against matter and shape it, giving room for the expression of your emotions.

DREAMS, THEIR PLANNING AND INTERPRETATION

Dreams are a marvelous working tool available to the therapist. Here you study your own dreams, learning to interpret their language according to levels of symbolism, gradually taking you deeper; you can also study the dreams which show you the paths illnesses will take and where their healing lies. Often it is right there, in the suspension of waking consciousness, that our soul is able to communicate with the mind, and thus with the body, activating mechanisms of self-healing.

INNER HARMONIZATION

This is a meditation technique developed by Damanhur, recovered from its origins which go back to Atlantis; this is a highly effective technique, ideal for learning to harmonize your energies and to contact your own subtle and spiritual dimensions. The course is organized into three progressive levels, over three years. In the first year:

Inner harmonization 1st level – sound and breathing

At the first level the focus is above all on conscious breathing, as the key to entering into your own being; and in order to stimulate the energy centres of the body the element of choice is sound. To listen, to sing, to locate sound within your own body, in your own points of vital energy-chakras (adonajba in Damanhurian Sacred Language), in the right positions with the rhythm that suits you and the group you work with – these are fundamental elements along the path to be travelled, so that within us there is harmony, inner peace and the alignment of our energies.

LA SELFICA

One of the most fascinating fields of research, and one which Damanhur has given a great boost to, is Selfic technology. Selfica is a discipline which concerns itself with the concentration and direction of intelligent life energy. Its roots are ancient: selfica was widely used in Atlantis and traces of it continued into Egyptian, Etruscan, Celtic and ancient Arab cultures. This technology, reintroduced in modern times into Damanhur through the research of Falco-Oberto Airaudi, works with spirals and the use of metals, colours, special inks and minerals, enabling the hosting of intelligent energies. Selfic energies belong to a sector of our universe where speeds are faster than light (superluminal), so when attracted to reside inside an object on this plane it is as if the selfic energies decelerate, and on our plane of existence manifest in the form of Sincronicity. Selfs attract conditions that are beneficial for physical life or for the personal development of the person, entering into their aura and circulating through their microlines, the energy lines of the human body. In return, the selfic

intelligence gets the opportunity to have experiences in a different world from its own. In the field of healing as developed here in Damanhur, so much real assistance is received from the world of selfica.

Additionally there will be lessons on elements of: experiential (hands on) Anatomy and Physiology; use of what we learn from meditation in the magical atmosphere of the Sacred Woods through contact with the element Ether; rudiments of Psycho-neuroendocrinology, Nutrition and dietary education.

SECOND YEAR

This level is devoted to the resolution of conflicts, the overcoming of ones' limits, the exploration of the therapeutic relationship, through the possibility of facing together, learner and instructor, themes and their outcomes emerging from the work of genuine deep-seated healing. From initial therapeutic relationships moving on to more complex ones. Also dealt with are the elements of training that will bring about heightened awareness and perception in the field of health and sickness.

All of the above-mentioned studies are supplemented by additional material. Personal experience is enriched by valuable meditations, either guided or spontaneous, in the Temples of Humankind.

For the monthly option during the second year, the monthly meetings on the second weekend of the month are completed with a final intensive week, held during the second week of August.

THIRD YEAR

During the third and final year participants move toward therapeutic maturity in the real sense through increasingly conscious use of energies and a magico-spiritual vision of life. At this level various methods are studied, including the laying on of hands and other systems of healing

that will serve to round out and more fully equip the Healer, for example Damanhurian massage. At the end of the year and the course as a whole, participants will be required to write a thesis which will then be discussed at the close of the course. For the monthly option, the third year has monthly meetings every first week-end of the month and is completed with a final intensive week held on the first week of August.

MASTER: FOURTH AND FIFTH YEARS

For those who want to extend their professional development further, continue to bring themselves up to date and adopt further methods of healing, Damanhur University offers a two-year Masters course, with five monthly meetings or an intensive over ten days.
